

APPENDIX G

LAND USE INFORMATION

Park and Open Space Maps G-1 Comprehensive Plan Elements

Rochester Trail System

BIKE ROUTE SIGNS identify on-road routes usually connecting or leading to off-road facilities. Signs are placed at intervals to keep bicyclists informed of changes in route direction and remind motorists of the presence of bicyclists.

BIKE PATH SIGNS identify off-road facilities. Bicyclists should stay to the right. Courtesy should be exercised towards pedestrians. Most bike paths are signed to prohibit motor vehicles.

BIKE LANE SIGNS identify a designated lane for bicycles usually on the right side of the roadway. Striping and bicycle pavement markers may also be used.

A bicycle is no match for a motor vehicle. When selecting a route consider the traffic volume, street width and age and skill of the bicyclists.

- Use hand signals when turning or stopping.

- Ride with the traffic on the right side of the road.
- Obey all traffic signs.
- Don't assume the motorist sees you.
- Take caution when riding along parked cars - a door could open in your path.
- Use lights at night.
- Stop before entering on to a street.

- Exercise caution when turning left through an intersection. Below are two ways to make a left turn through an intersection; (1) like an auto signal, move into the left lane and turn left, (2) like a pedestrian ride straight to the far-side sidewalk and walk your bike across. The method used should depend on the skill of the rider and traffic conditions.

Park System
